

LOCKET PHOTO GUIDE

PANDORA

You'll need:

- *Your locket*
- *Existing photo or a printer and paper*
- *Scissors*
- *Tweezers (optional)*

Step 1:

Choose your photo

First, choose a special photo that you'd like to keep in your locket. This could be anything: a picture of a loved one, a motif that holds sentimental value, a drawing from someone close to you - the only limit is your imagination.

Step 2:

Print it out on photo paper

Use your computer to print out your photo and a copy of this guide. Ensure the photo is sized correctly to fit inside your Pandora locket. We recommend printing your photo as a 2cm x 2cm square for the best fit. Standard printing paper will work, but for the best results, we recommend printing your photo on high-quality photo paper. Please note: you can skip this step if you already have a custom image printed.

Step 3:

Cut it into the correct shape

Cut out the round locket template from the top of your printout, then place it over your photo. Trace around the template to create an outline, then cut your photo to match the size and shape.

Step 4:

Insert into your locket

Finally, open your locket and carefully place the photo inside the locket's compartment. Make sure it is centered and correctly positioned. You can also use tweezers if more precision is needed. Close your locket, and you are ready to go!

Congratulations!

Now you can keep your favorite moments or loved ones close to your heart on a locket necklace or style your locket on a bracelet to wear your heart on your sleeve.
